SUMMARY

Experienced Software Developer with 3+ years of industry expertise delivering high-quality software solutions using modern and legacy technologies. Proficient in Agile methodologies and the full software development lifecycle, including business requirements analysis, stakeholder coordination, solution design, development, testing, and deployment. Strong technical foundation in ASP.NET (Core 8.0 and earlier versions), Azure services, SQL Server, and VB6.0. Known for maintaining high code quality, designing scalable solutions, and bridging technical and business teams to ensure successful project delivery in dynamic environments.

WORK EXPERIENCE

Software Engineer , Comply India

March 2026 - Present

- Contributing to product integration and consolidation initiatives across platforms.
- Developing full-stack applications using .NET backend with React, Angular, and VueJs frontend technologies..
- Contributing to system architecture design and technical solution planning.
- Initiating AI-driven “vibe coding” practices, researching modern AI-assisted development techniques, and setting up AI workstations for enhanced development workflows.

Software Developer , Thoughtline Technologies Pvt Ltd.

Dec 2022 - Feb 2026

- Led Agile-based end-to-end software development and project delivery.
- Built scalable applications using .NET Core 8, ASP.NET MVC, Web APIs, and Azure.
- Maintained and enhanced VB6 and older .NET applications while modernizing legacy systems.
- Optimized database performance and ensured code quality through testing and reviews.
- Developed responsive applications using Angular, React, and React Native.

Internship (Asp.net MVC with Angular - Full Stack), Luminar Technolab

Jul 2022 - Dec 2022

- Attended an internship program focused on developing web applications using **ASP.NET MVC** and **Angular**.
 - Designed and implemented frontend and backend components.
 - Gained hands-on experience in full-stack development.
 - Learned and applied industry best practices.
-

SKILLS

Languages & Frameworks:

C#, ASP.NET, MVC, .NET Core, Web API, ADO.NET, Entity Framework, EF Core, Visual Basic 6.0, ReactJS, Angular, React Native, VueJs

Database & Data Handling:

SQL Server, IronXL, JSON, XML

Cloud & Deployment:

Microsoft Azure, CI/CD Pipelines, Jenkins, Octopus Deploy

API & Integration:

RESTful APIs, Microservices Architecture, Authentication (JWT, OAuth2), API Gateway, Swagger, Postman, Third-Party API Integration

Development Tools & Source Control:

Visual Studio, Visual Studio Code, Azure Repos, Git, Bitbucket, GitHub, TortoiseSVN, JIRA,

Architecture & Design:

Object-Oriented Programming (OOP), Design ,MediatR Framework, CQRS Pattern , Folder Structuring and Layered Design,High-Level Design, Low-Level Design, Flow Diagram Creation

Other Technologies:

MS Office, Excel Automation, JSON Parsing, XML Handling, REST Clients, Windows Services, Worker Services

Soft Skills

Agile & Scrum Methodologies, Agile Project Management, Requirement Analysis, Task Prioritization, Documentation, Problem-Solving, Critical Thinking, Debugging, Communication, Collaboration, Team Leadership, Knowledge Transfer (KT), Time Management, Adaptability, Continuous Learning, Ownership & Accountability

EDUCATION

MAHATMA GANDHI UNIVERSITY

Jun 2019 - Mar 2022

B.com(Computer Application)

PROJECTS

Communication Migrating to SFMC

- Successfully migrated a legacy communication service application to Salesforce Marketing Cloud (SFMC). Redesigned the service using .NET Core 8.0 and hosted it on Azure, enhancing scalability and performance while ensuring smooth integration with SFMC.
- Upgraded a legacy communication service to a modern architecture by developing Worker Services and API services in .NET Core 8.0, leveraging Azure-hosted.
- Designed and built new database structures, ensuring optimized query performance and scalability to handle large data volumes. Created stored procedures implemented robust error-handling mechanisms.
- Utilized the latest MediatR framework to implement clean and maintainable CQRS patterns, improving code organization and reducing complexity across services.

Software Development , migration and Maintenance:

- Developed and maintained a range of applications, from legacy systems (VB6.0) to the latest .NET Core 8.0 solutions. Enhanced functionality, Implementing new features ,resolved complex bugs, and ensured seamless operation for both older and modernized systems
 - Developed and enhanced Angular applications by implementing new features, creating reusable services, resolving UI and integration issues, and ensuring smooth performance across evolving front-end requirements.
-
